

COLLINS WORKALL®

WORKALL is the **ONE** versatile tractor design for your forestry, construction, and agricultural needs.

COLLINS WORKALL® can be used with standard farm attachments, thereby eliminating the need for multiple single-purpose machines (i.e. skidder, dump truck, loader, backhoe, snowblower, mower, forklift, rototiller).

Its tip-resistant oscillating and articulating center joint securely keeps all four wheels on the ground. This feature, combined with **WORKALL's** narrow width, equal weight distribution, and excellent maneuvering characteristics, makes the **WORKALL** a safe, conservation-friendly tractor, ideal for use in the rugged, hilly New England terrain.
